Art Unit: 1797

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by 20040094485.

Claim 2 is rejected under 35 U.S.C. 103(a) as being obvious over 20040094485 in view of 6669849. '849 uses ion exchange technology to decontaminate organic carbon from wastewater. It describes the use of brine (a concentrated inorganic salt solution) to regenerate the resin. '485 describes a technology to remove dissolved organic carbon from concentrated inorganic salt solutions. It would have been obvious to have used the '485 technology to decontaminate the regenerant of DOC because '485 technology is adapted for removal of DOC from concentrated inorganic salt solutions.

Claim 28 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Absent a definition of the flow or mass processing rate, the term "industrial scale process" is unreasonably imprecise.

Claims 3 – 27 are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1797

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
